Subject: Application for the position of MERN Developer

Dear Sir,

I am writing to you regarding the MERN Developer position that has recently opened in your company. I am very much interested in applying for this position. I truly believe that working at your organization will be an enriching experience. It will help me learn in a professional environment with the senior resources and would greatly appreciate you considering my application to develop and enhance the skills.

I am a recently graduated student from Kantipur Engineering College. I have completed a node.js internship from E.K. Solutions Pvt. Ltd. Being a fresher, I think I am very flexible and adaptive to learn new things. I am focused and attentive to detail when addressing high-volume tasks.

My academic and internship experiences have served me well in developing my communication, interpersonal and management skills. I firmly believe that interest in a particular field is a powerful driving factor for growth. I am applying for this position to put my skills and knowledge to the best use and allow them to develop further. Please take a moment to review my attached resume. Thank you for your time and consideration.

Sincerely,
Palisha Shakya.
